

See you at ONS Stavanger, Norway 27-30 Aug 2018 – Hall B Stand 2710

ECLIPS (previously Sea Box International Pty Ltd) is an Australian systems engineering company that designs and fabricates purpose-built containerised logistics platforms and deployable hybrid power solutions. With a history in servicing defence forces, governments, emergency services and the resource sectors, ECLIPS's solutions are focused upon modularity, intermodal freight compatibility and standardisation. ECLIPS is a results-focused company, which prides itself on producing innovative solutions to power and logistics problems.

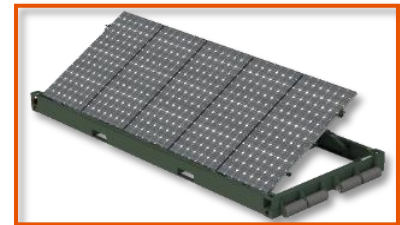

ECLIPS has been in operation for over ten years, with multiple offices in Australia, and has a growing network of international partners and resellers. ECLIPS and its partner network enables access to world leaders in intermodal logistics and power solutions.

ECLIPS's success is based on:

- in-house design and innovation offering customisation and flexibility
- high quality, technologically advanced and market proven products
- diversified product range
- a focus on meeting agreed customer requirements
- careful selection of quality partners and suppliers
- a productive, skilled and stable workforce with significant experience with Australian Defence and international supply chains
- on-time and on-budget delivery
- financial strength and sound company management
- value for money and competitive pricing.
