M-CASE 124

Modular Container and Storage Equipment  
(M-CASE) 124

## PRODUCT FEATURES

- > The ECLIPS Modular Container and Storage Equipment (M-CASE) 124 is designed to be fully compatible with MIL STD 3028 JMIC, and is part of the Joint Modular Intermodal Logistics System (JMILS), which represents the next evolution in reusable modular containerisation.
- > The system is designed to maximise the volume of standard logistics platforms.
- > The M-CASE's compatibility with the JMIC means it can be used in highly automated supply chains and fitted with a range of sensors that allow the digitalisation of the supply chain.
- > Compatible with a normal green army trunk, it can be fitted with additional handles, wheels or a range of inserts to meet your requirements. Its compatibility with MIL STD 3028 and its ability to interface with the in-service system makes the M-CASE one of the most flexible packaging systems in the ADF.
- > The M-CASE is UV stabilised LLDPE.
